

Folsom-Howard Streetscape Project

Project Background

The San Francisco Municipal Transportation Agency (SFMTA) is redesigning Folsom and Howard Streets to improve space for people walking and biking and make future transit service more reliable and accessible.

The project runs along Folsom (from 2nd to 11th) and Howard (from 3rd to 11th) in District 6.

Walk San Francisco wants you to have a say in what SoMa's streets will become. Don't miss these opportunities to give the SFMTA your project input:

Current Challenges

Folsom and Howard are both on **San Francisco's High Injury Network**, which represents the 12% of city streets that account for over 70% of ALL traffic crashes.

Unsafe Conditions for People Walking and Biking

Traffic Congestion and Transit Delays

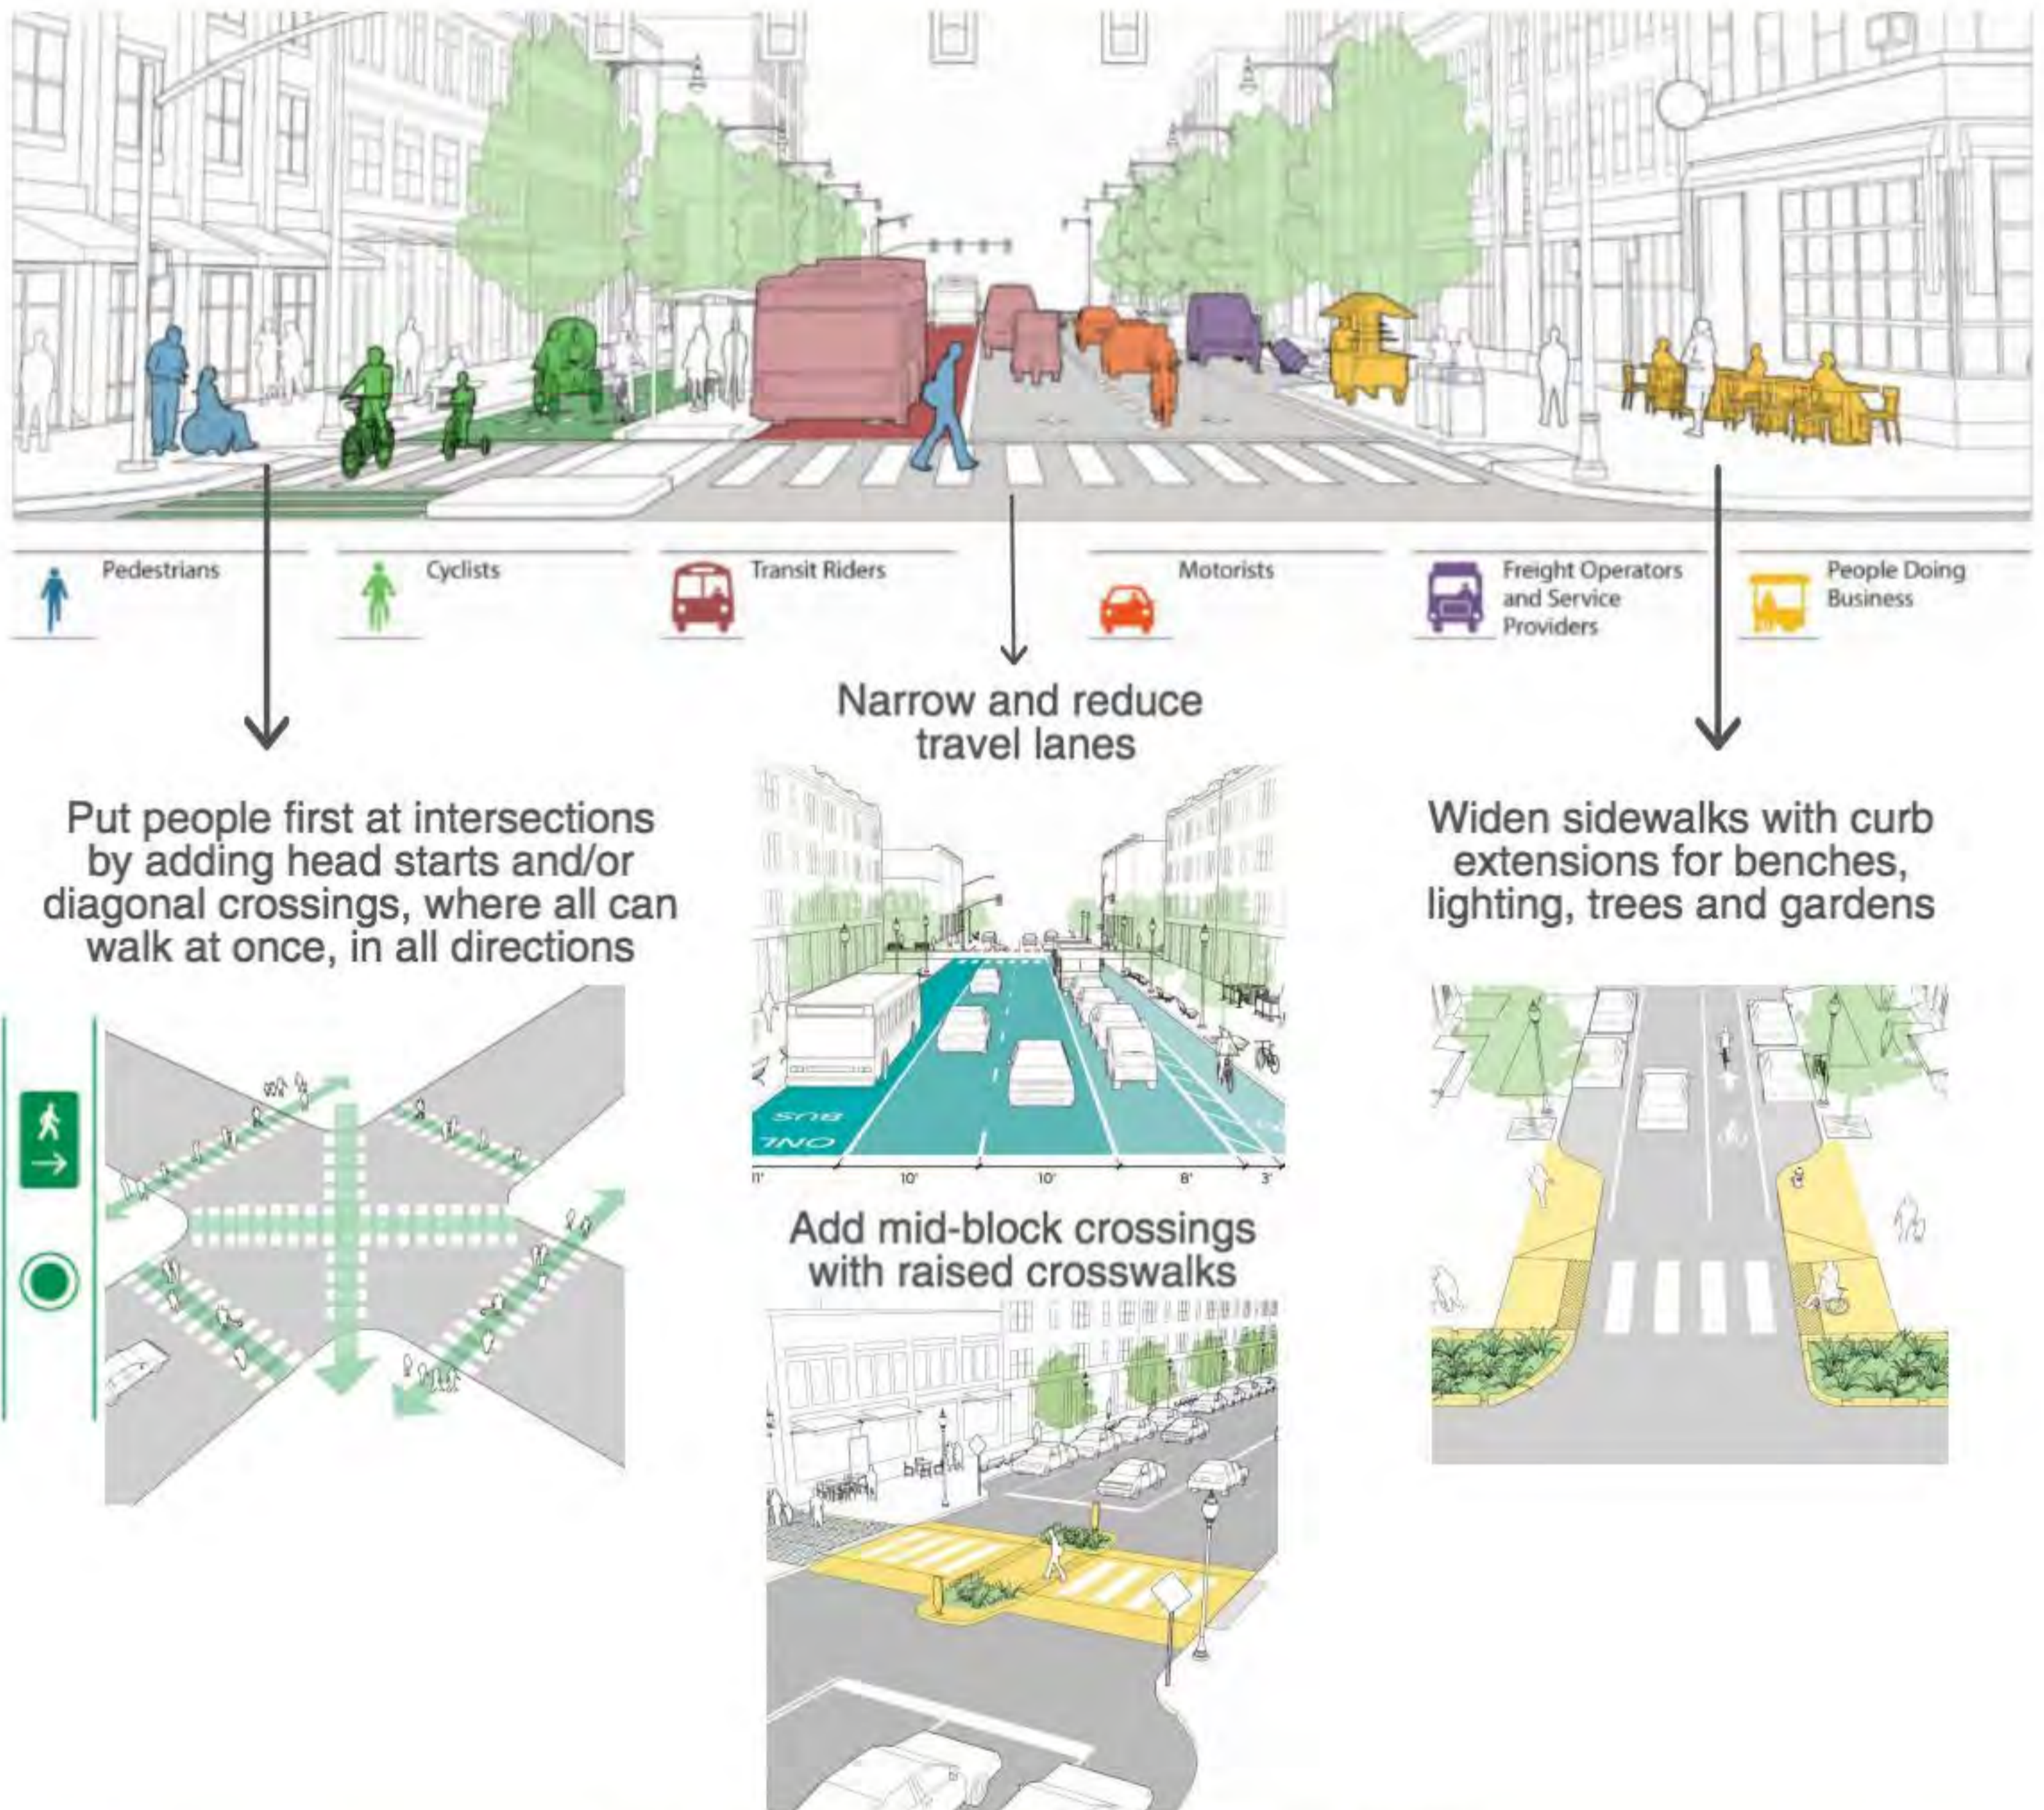

Lack of Inviting Public and Green Space

Possible Solutions →

Walk SF advocates for a more livable, walkable city by reclaiming streets as safe, shared public space everyone can enjoy.

Together, we can tell the SFMTA to transform these streets into safe, inviting and green places where people are the priority!
