

Page Street Green Connection

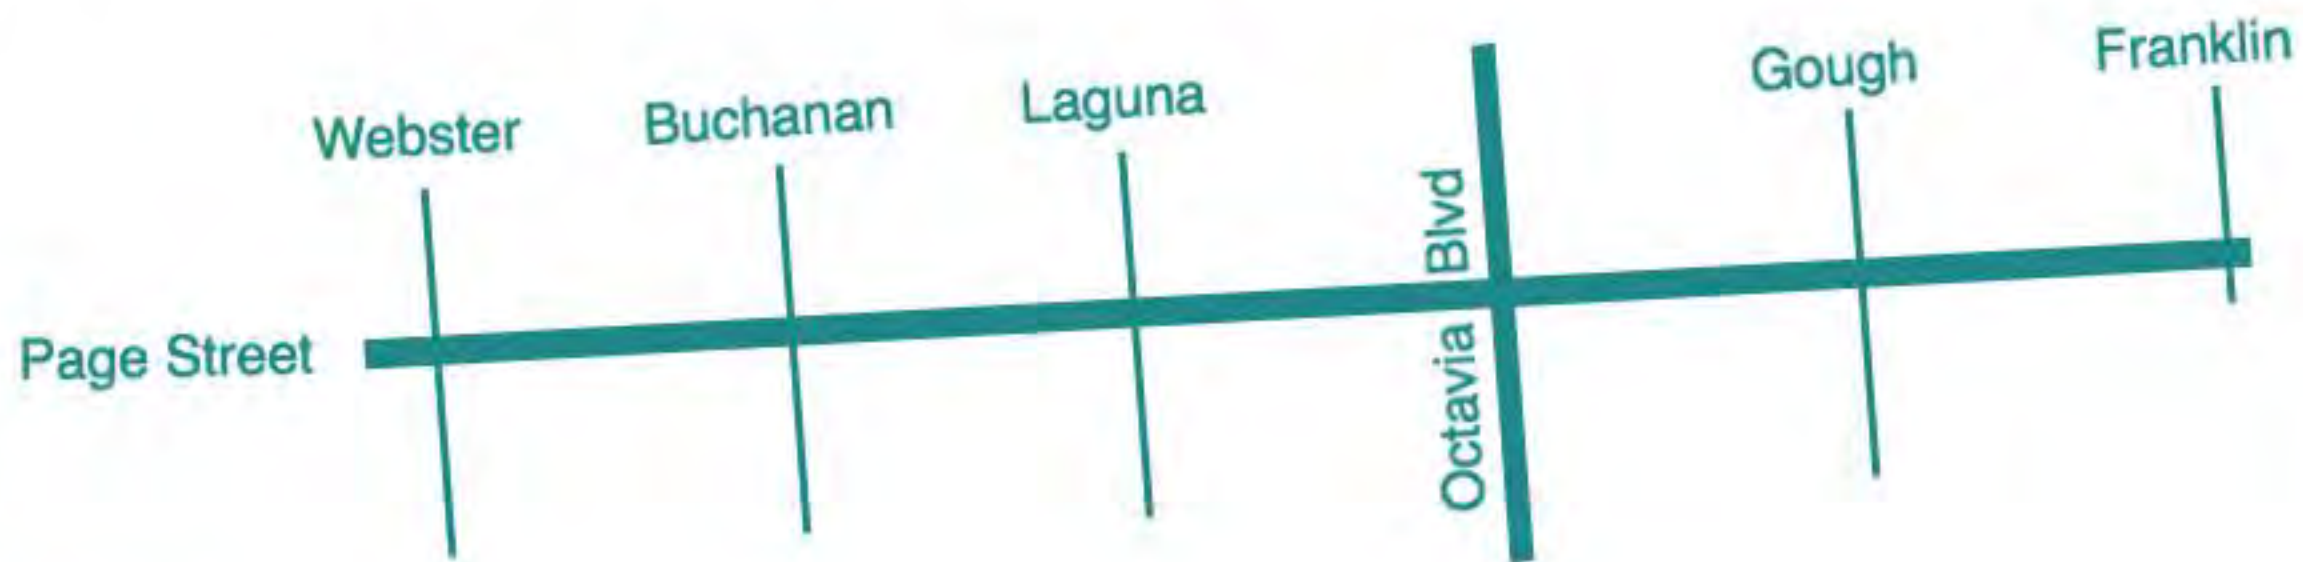

What is a Green Connection?

A Green Connection is a safe, inviting, and green street that connects people to parks, open space, and the waterfront. As part of a 115 mile citywide network, Page Street is one of 24 planned Green Connections routes and is one of the first to be built.

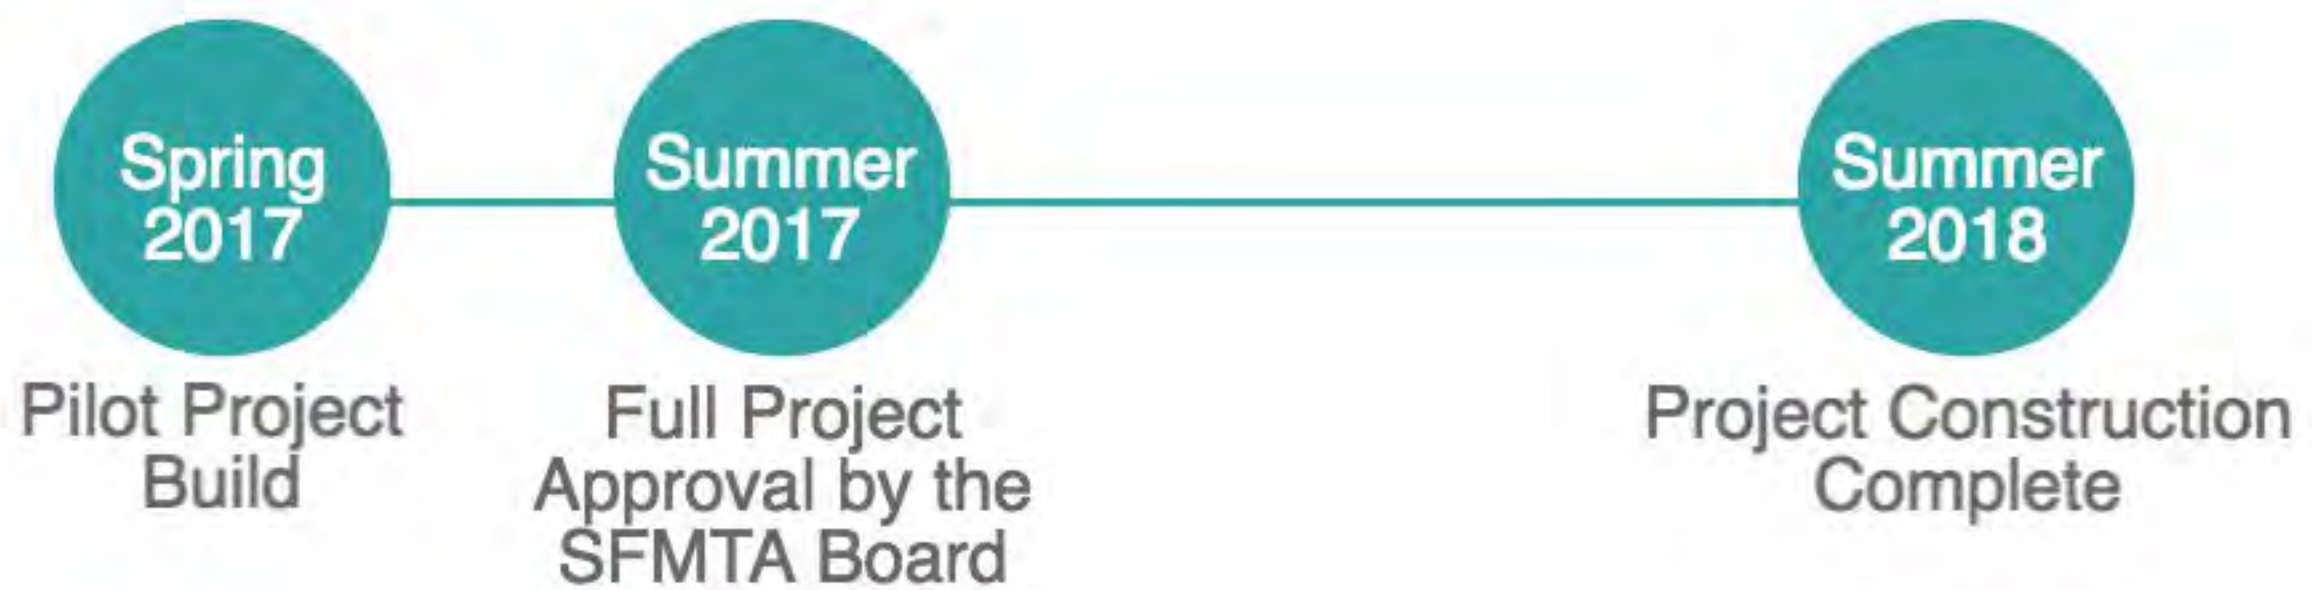

Green Connections projects have three goals: public health, livability, and sustainability.

Where?

The Page Street Project runs from Webster to Franklin Street in District 5.

When?

Goals for Page Street

Implemented by the San Francisco Municipal Transportation Agency (SFMTA), this project aims to:

Prioritize and improve the experience of people walking and biking to make it safe and enjoyable.

Slow traffic and reduce congestion (especially around John Muir Elementary).

Build new landscaping, including green stormwater infrastructure.

Walk San Francisco advocates for a more livable, walkable city by reclaiming streets as safe, shared public space everyone can enjoy.

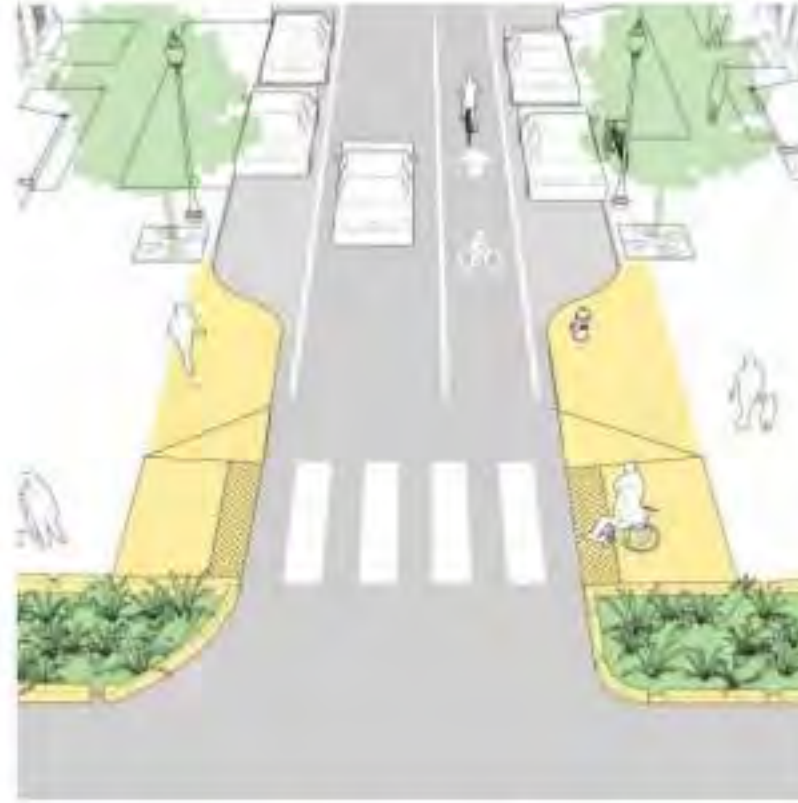

We want the SFMTA to transform Page into a safe, inviting, and green street where people are the priority. We need your help!

Vision

Solutions

Walking and biking on Page Street are both safe and more enjoyable for everyone.

- Wider Sidewalks
- Corner sidewalk extensions
- Painted Bike Lane

Neighbors' health is improved by reducing congestion and pollution, and creating a safe street that encourages active transportation.

- Speed bumps
- Raised crosswalk/intersection
- Traffic circles/diverters

Local and citywide sustainability and stormwater management are enhanced with green landscaping.

- More street trees
- Permeable pavement
- Gardens that capture rainwater
